

SECRET

19 November 1974

NOTE FOR THE DIRECTOR

THROUGH : D/DCI/IC

SUBJECT : Civil Requirements for
Imagery of the U.S.

This is to alert you to a joint civil agency request to COMIREX for specific and formal assurances on the continued availability of satellite imagery to support their domestic application programs. These agencies have been involved in continuing or pilot applications with current satellite materials and are at a stage in their planning and program development where they must make decisions and commitments on long-range dedication of resources to exploit satellite imagery.

We have been staffing a review of this request and its implications and will have an evaluation, recommendations, and a draft response by 27 November.
